

Year 10 German independent work:

There are 3 main websites for you to use to complete your independent work. You would normally have 3 German lessons a week, so you can divide your time equally between the 3 websites. You could either spend a 1 hour lesson on each website, or complete 3 x 1 hour lessons divided into 3 x 20 minute sessions.

1. Vocab Express

www.vocabexpress.com

You have your own username and password. The school code is UKTAPS.

Please choose the “Edexcel German 9-1” vocabulary list. You should start with ‘High frequency vocabulary’ which is useful across all topics. Then you should move on and work on any incomplete blocks from the ‘School’ and ‘Identity and Culture’ and ‘Local area, holiday and travel’ themes.

2. Active Learn

www.pearsonactivelearn.com

You should have your own username. The password is year10german

1. Log in
2. Click on ‘Library’ at the top left of the page
3. Select ‘Stimmt! Edexcel GCSE German’

If you work with the foundation book in class, work on the foundation exercises. Choose higher if you use the higher textbook. Start with Chapter 1, and start with any exercises which are incomplete. You should try and go as far as you are into the year 9/10 course (Chapters 1-6). If you have completed all the exercises up until the current topic, you could also go back and revise/revisit some of the older activities to check you still remember the vocabulary and grammar.

3. Linguascope

www.linguascope.com

You will have used this website in class. It has lots of vocabulary to practice on different topics. The username is ‘appleton’ and the password is ‘apple2019’.

You should select the ‘intermediate’ section and the German flag. There are lots of revision games to play on different topics. Please try to revise some old topics as well as teach yourself some new vocabulary on a different topic. If you would like to try some of the worksheets you can also print and complete some of them if you have access to a printer.
